TIEM	Unit Standardized Pressure Injury Prevention Protocol Checklist (SPIPP- Adult) 2.0 Date				
Significant current or anticipated mobility problems Use a structured risk assessment approach (e.g., Braden or other validated risk tool) on admission Reassess risk q shift and with significant change in condition Patient/family informed of Pf risk and prevention plan Additional risk factors considered? Pervisous Pf. Localized painDiabetes _Poor perfusion _Vasopressors _Oxygenation deficits _Increased Temp _Advanced Age _Spinal cord injuryNeuropathy _ Surgery/procedure duration > 2 hrs Critical illness _Organ Failure _ Sepsis _ Mcchanical vont _ Medical devices _ Sectation _ _		ITEM	Completed Yes/No	COMMENT	
Use a structured risk assessment upproach (e.g., Braden or other validated risk tool) on admission Reassess risk q shift and with significant change in condition Patient/Emily informed of PI risk and prevention plan Additional risk factors considered: Previous PL., Localized pain., Dinbetes., Poor pertission. — Vasopressors. — Oxygenation deficits. Increased Temp. — Advanced Age., Spinal cord injury, Neuropeahy, Surgery/procedure duration > 2 hrs., Critical illness., Organ Fallure, Sepsis., Mechanical vent., Medical devices, and pressure injury Assess Skin (Comprehensive, visual, palpation) upon admission and q shift for crythema, discoloration, celean, and temperature Assess skin under medical devices q shift Device(s): Inspect heeks q shift In people of color. Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care-Manage moisture/Incontinence Cleanse and apply appropriate moisture barries promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Baden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use bigh specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use bigh specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use bigh specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility	As	sess risk factors for pressure injury to guide risk-based prevention			
Reasess risk q shift and with significant change in condition Patient Tamily informed of P1 risk and prevention plan Additional risk factors considered: Previous P1 _ Localized pain _ Diabetes _ P007 perfusion _ Vasopressors _ Oxygenation deficits _ Increased Temp _ Advanced Age _ Spinal count injury _ Neuropathy _ Surgery/procedure duration > 2 lms _ Critical illness _ Organ Failure _ Sepsis _ Mechanical vent _ Medical devices _ Sodation _ Assess Skin/Tissue for signs of skin damage and pressure injury Assess skin (comprehensive, visual, palpation) upon admission and q shift for erythema, discoloration, edema, and temperature Assess skin after medical devices q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care- Manage moisture/frontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/feed management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply which graterial to skin folds when appropriate Redistribute Pressure Transcripsition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foum or reactive air mattress/overlay for immobile persons (Braden Activity) Mobility score 1 or 2) Use high specification reactive foum or reactive air mattress/overlay for immobile persons (Braden Activity) Mobility score 1 or 2) Use high specification reactive foum or reactive air mattress/overlay for immobile persons (Braden Activity) Mobility score 1 or 2) Use high specification reactive foum or reactive air mattress/overlay for immobile persons (Braden Activity) Mobility score 1 or 2) List of the provide adoptate reposition of per	Significant curre	ent or anticipated mobility problems			
Patient/family informed of PI risk and prevention plan Additional risk factors considered: Previous PI Localized pain, Diabetes, Poor perfusion Vasopressor, Oxygenation deficits, Increased Temp, Advanced Age, Spinal cord injury Neuropathy Surgery/procedure duration > 2 hrs, Critical illness, Organ Faiture Spess, Mechanical vent, Medical devices, Selation Assess Skin/Tissue for signs of skin damage and pressure injury Assess skin (comprehensive, visual, palpation) upon admission and q shift for erythema, discoloration, eldena, and temperature Assess skin under medical devices q shift Impect beels q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care-Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider uninary/feed management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual neceds and risk, unless contraindicated (Banden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning adds that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of hed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heeles) (Braden Activity/Mobility score 1 or 2) Elevate hoels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Consider reminder systems, pres	Use a structured	risk assessment approach (e.g., Braden or other validated risk tool) on admission

Assess kin/Tissue for signs of skin damage and pressure injury Assess kin (comprehensive, visual, palpation) upon admission and q shift for crythema, discoloration, cdema, and temperature Assess skin under medical devices q shift Device(s): Inspect heels q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care-Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn-reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Redistribution method and the stream of the provide adequate repositioning (30 degree) when side lying Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use positioning aids that minimize for persons who cannot adequately reposition Reposition seator persons qualified tool on admission Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility					
Assess Skin (comprehensive, visual, palpation) upon admission and q shift for crythema, discoloration, cleam, and temperature (action, and temperature) Assess skin under medical devices q shift Inspect heels q shift Inspect heels q shift Device(s): Inspect heels q shift Device(s): Inspect heels q shift Device(s): Inspect heels q shift Preventative Skin Care- Manage moisture/Incontinence Cleamse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleamsers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Tura/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contramidicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Reep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels of bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement cardy mobilization program Nutrition Sereen for malnutrition using a validated tool on a					
Assess skin (comprehensive, visual, palpation) upon admission and q shift for erythema, discooloration, ederma, and temperature Assess skin under medical devices q shift Inspect heels q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods: thermography, SEM, skin color chart Preventative Skin Care-Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1 or 2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early	_				
discoloration, edema, and temperature Assess skin under medical devices q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care- Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soups/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity) score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or hecks) (Braden Activity/Mobility scores 1-2) Elevate heels of the dwith pillows, heel devices or hoots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization programs Nutrition Serven for malnutrition using a validated tool on admission Consult dictitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vi					
Assess skin under medical devices q shift Inspect heels q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care- Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use slow, gradual, frequent, small, body shifts when unstable Use slow, gradual, frequent, small, body shifts when unstable Use spressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consult Physical Therapy for graden Pt (Braden Nutrition Serven for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater Pt (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e				Location(s):	
Inspect heels q shift In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin to augment visual Preventative Skin Care- Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air matress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heelest) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure distributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, pr		-		Device(s):	
In people of color: Ensure adequate lighting and moisten/moisturize skin to augment visual Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care- Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or hects) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use slow, gradual, frequent, small, body shifts when unstable Use slow, gradual, frequent, small, body shifts when unstable Use slow, gradual, frequent, small, body shifts when unstable Use slow, gradual, frequent, small, body shifts when unstable Ocusult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consult Therapy for mobilization program when appropriate (Braden Activity/Mobility Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consult deititian for persons with or at risk of malnutrition, decreased nutrient intake, NPO		-		Device(b).	
Consider enhanced skin assessment methods- thermography, SEM, skin color chart Preventative Skin Care- Manage moisture/Incontinence Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score I or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score I or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores I-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score I-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater P1 (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as	•				
Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dictitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate					
Cleanse and apply appropriate moisture barriers promptly after each incontinent episode Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heeles) (Braden Activity/Mobility scores 1 = 2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing scat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systlems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dieitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate	Consider ennance				
Avoid use of alkaline soaps/cleansers Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater P1 (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate	Cleance and ann	·			
Consider urinary/fecal management systems for high-risk persons Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dicitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate					
Single layer, breathable, high absorbency pads for incontinence Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dicitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate		•			
Consider using low friction textiles Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate					
Apply wicking material to skin folds when appropriate Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate					
Redistribute Pressure Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate					
Turn/reposition q 2-3 hours persons who do not have independent bed mobility and as required by individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate	Apply wicking i				
individual needs and risk, unless contraindicated (Braden Activity/Mobility score 1 or 2) Use high specification reactive foam or reactive air mattress/overlay for immobile persons (Braden Activity/Mobility score 1 or 2) Use positioning aids that minimize friction/shear (pillows, wedges). Use turn/lift equipment if available Keep head of bed as flat as possible Place silicone multilayer foam dressings on areas of high-risk (i.e., sacrum, lower buttocks, or heels) (Braden Activity/Mobility scores 1-2) Elevate heels off bed with pillows, heel devices or boots (Braden Sensory Perception score 1-3) Provide adequate repositioning (30 degree) when side lying Use slow, gradual, frequent, small, body shifts when unstable Use pressure redistributing seat cushion for persons who cannot adequately reposition Reposition seated persons q 1 hour Consult Physical Therapy for mobilization program when appropriate (Braden Activity/Mobility Consider reminder systems, pressure mapping, motion sensors Implement early mobilization program Nutrition Screen for malnutrition using a validated tool on admission Consult dietitian for persons with or at risk of malnutrition, decreased nutrient intake, NPO > 48 hours or presence of stage 2 or greater PI (Braden Nutrition Score 1-2) Provide additional calories, protein, fluids, and additional nutrients (i.e. multi-vitamin, arginine, glutamine, HMB) per nutrition plan of care or as appropriate	T/
